PROFESSIONAL SUMMARY

Lead Software Engineer with 9+ years of experience designing and architecting scalable **backend services, RESTful APIs, and distributed event-driven systems** powering enterprise-grade eCommerce platforms using C#, ASP.NET Core, and Azure Cloud. Expertise in Microservices, CQRS, Clean Architecture, Dependency Injection, and Test-Driven Development (TDD), delivering high-quality solutions with 99%+ test coverage.

Strong background in API architecture, performance optimization, asynchronous programming, and secure backend development (RBAC, GDPR). Actively leveraging **Agentic AI coding workflows** using GitHub Copilot, Claude, ChatGPT, and Gemini to enhance developer productivity, code quality, and delivery speed.

Proven leadership in guiding cross-functional teams, conducting code reviews, and implementing CI/CD pipelines through Azure DevOps. Recognized for developing award-winning national e-Governance projects, including the WSIS Award 2021-winning CBVMP for BTRC and e-TIN solutions for the National Board of Revenue. Background in competitive programming, ACM-ICPC Dhaka Regional Contests participant (2014–2016).

TECHNICAL SKILLS

Programming Languages: C#, Java, SQL, JavaScript

Frameworks & Architecture: .NET 8, ASP.NET Core, RESTful APIs, Web API, CQRS, Clean Architecture, Event-Driven Architecture, Dependency Injection, Middleware, Async Programming, Caching (Output Caching), Scheduled Jobs (Cron)

Data Access: EF Core, LINQ

API & Security: Swagger/OpenAPI, JWT, OAuth2, RBAC, Secure API Design

Cloud & DevOps: Azure DevOps, CI/CD Pipeline Design, Docker, Observability, Logging, Monitoring

Databases: Microsoft SQL Server, Oracle, MySQL

AI-Assisted Development: GitHub Copilot, ChatGPT, Claude, Gemini, Prompt Engineering, Agentic AI Workflows

Reporting & Monitoring: MS Report Builder, ELK Stack (Elasticsearch, Logstash, Kibana), NLog

ERP & Enterprise Systems: SAP ERP (Foundational Knowledge), Enterprise Resource Planning (ERP) Concepts

Testing & Quality Assurance: TDD, Unit Testing (XUnit, MSpec), Mocking (Moq)

Architecture & Documentation: System Architecture Design, Technical Documentation, Confluence, Draw.io, Azure DevOps Wiki

Leadership: Agile/Scrum, Code Review, Requirements Analysis, Stakeholder Management, Task Estimation, Ticket Management

PROFESSIONAL EXPERIENCE

Software Developer (.NET/SharePoint) — Contractor (May 2026 – Present)

Deloitte, Toronto, ON, Canada (Remote) [via Paralucent]

Working as an independent contractor contributing to enterprise-grade backend systems using C#, ASP.NET Core, and modern engineering practices within a distributed global team.

Collaborating on scalable application development, system enhancements, and production support in a Microsoft ecosystem (Azure, DevOps, CI/CD).

Lead Software Engineer (Aug 01, 2024 – Sep 30, 2025)

Echologyx Ltd., Dhaka, Bangladesh (Client: Connect Distribution Services Ltd. / ScrewfixSpares, Kingfisher PLC)

Led and mentored a team of 8–10 engineers delivering scalable **backend services and RESTful APIs** for **eSpares.co.uk**, a high-traffic UK eCommerce platform, achieving **99.9% uptime and 20% faster deployment cycles** using C#, ASP.NET Core, .NET 8, and Azure DevOps.

Owned end-to-end delivery including business analysis, solution design, estimation, and stakeholder alignment with UK business teams.

Guided development across microservices, APIs, and integrations using CQRS, Clean Architecture, TDD (XUnit, MSpec), ensuring 99%+ test coverage and near-zero post-release defects.

Contributed to both eCommerce and **Warehouse Management System (WMS)** features, including inventory workflows, reporting, and system integrations supporting UK fulfilment operations.

Authored architecture diagrams, technical documentation, and operational reports using Confluence and Draw.io; enforced RBAC, GDPR compliance, and secure API standards.

Integrated **Agentic AI development workflows** (GitHub Copilot, Claude, ChatGPT, Gemini) to accelerate backend development, improve code quality, and streamline documentation and engineering productivity.

Senior Software Engineer (Nov 10, 2020 – Jul 31, 2024)

Echologyx Ltd., Dhaka, Bangladesh (Client: Connect Distribution Services Ltd. / ScrewfixSpares, Kingfisher PLC)

Key architect of 30+ microservices on eSpares.co.uk supporting **15,000+ daily users & £1M+ monthly sales**.

Achieved 99% unit test coverage via TDD; reduced production defects to near zero.

Optimised SQL Server for 1M+ products across UK & Ireland; authored architecture docs in Confluence.

Programmer (Dec 23, 2017 – Nov 04, 2020)

Synesis IT PLC, Dhaka, Bangladesh

WSIS Award 2021 — Built CBVMP for BTRC (Java/Oracle): biometric verification for **100M+ SIM holders, 500 TPS, zero downtime**.

Developed e-TIN APIs (ASP.NET Core/SQL Server) for National Board of Revenue; integrated government stakeholders to boost tax compliance.

Implemented ELK Stack monitoring; reduced incident detection time significantly.

Developed e-Governance solutions using Java, C#, ASP.NET Core, and SQL Server.

.NET Developer (Jan 17, 2017 – Dec 21, 2017)

RMG Networks, Dallas, TX, USA (Remote)

Built desktop applications for digital signage solutions using C#, RCF, WCF, and WPF.

EDUCATION

M.Sc. in Computer Science and Engineering (Jan 2018 – Jun 2019)

Jahangirnagar University, Dhaka, Bangladesh

Research Topic: Sales forecasting using time series analysis

B.Sc. in Computer Science (May 2013 – Dec 2016)

American International University-Bangladesh (AIUB), Dhaka, Bangladesh

Research Topic: Human health monitoring system using Wireless Sensor Body Area Network (WSBAN)

AWARDS & RECOGNITION

WSIS Prize 2021 (World Summit on the Information Society) — Central Biometric Verification Monitoring Platform (CBVMP), Action Line C5 category. One of the world's most prestigious ICT awards.

ACM-ICPC Dhaka Regional Contests participant, 2014–2016 (competitive programming background).
